The Examiner’s amendment have been made in order to clarify the hysteresis offset, hysteresis delay and the output load adjustment are selectively programmed by control signals and to place the application in a condition for allowance.

2. The following is an examiner’s statement of reasons for allowance: the amendment filed 6/16/2005 and the telephonic interviewed on 7/29/2005 have overcome the technical deficiencies and the prior art of record. The prior art of record fails to teach or fairly suggest a combination of

Art Unit: 2816

first current source and a resistor to generate a hysteresis offset, third transistor and a capacitor as called for in claim 1, hysteresis delay and hysteresis offset are independent of the digital output signal as called for in claims 10, 22, 34, 46, 58, 70, 73, 117, 120, 122, 125, 128, 130, 133 and 139 the hysteresis offset is independent of the digital output signal as called for in claims 18, 20, 30, 32, 82, 94, 106, 123, 131 and 138 the second programmable circuit further includes a plurality of selectable current sources as called for in claims 19, 31 and 43, selectively providing control to the digital output signal in response to a third programmable control signal as called for in claims 42, 44, 54, 56, 66, 68, 78, 80, 118, 124, 126, 132, 134 and 136, the hysteresis delay is independent of the digital output signal as called for in claims 83, 95, 107, 121, 129, 137 and 140. Therefore, claims 1-3, 5-6, 8, 10-20, 22-32, 34-44, 46-56, 58-68, 70-71, 73-80, 82-92, 94-104, 106-118, 120-126, 128-134 and 136-140 are presently allowed.

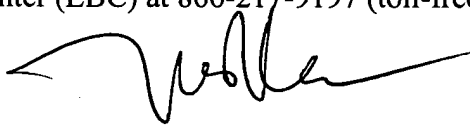

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
